# NAZIS BLOCK DUTCH RHINE CROSSING

## BREST FALLS AFTER 46-DAY ALLIED SIEGE

## PORT'S FACILITIES WRECKED, CITY IN FLAMES

Supreme Headquarters, Allied Expeditionary Force, Sept. 20 (AP)—The great port of Brest on the Brittany peninsula fell to Allied troops today after 46 days of siege and almost constant pounding by air forces.

Headquarters announced tersely, "all organized resistance has ceased in Brest and Recouvrance and our troops have cleared the enemy from the Crozon peninsula."

The Recouvrance area is south of the city and the Crozon peninsula is southeast.

### Last Shell Fired

Confirmation of the victory came from the German radio, which declared Brest was in flames and its port facilities totally wrecked before "heroic defenders under command of Lt. Gen. Ramcke" gave up last night "after the last shell had been fired."

There was no official word from the Allied side on the condition of the port, but it was generally expected to be a worse mess than Cherbourg, captured in the first days of the invasion.

The siege of Brest came soon after the Allied breakthrough from the Normandy peninsula. While battlefronts swept across endless miles of French soil to the German frontier, its defenders held doggedly to their positions.

Lorient and St. Nazaire, on the south coast of the Brittany peninsula, still are besieged.

The German radio said Hitler had awarded Ramcke the Oak Leaves with Swords and Diamonds to add to his knight's insignia of the Iron Cross for his defense of Brest, but added that the fate of the Nazi officer was unknown. Supreme headquarters sources refused to speculate on whether allied salvage crews would be able to work on the port at Restoration of the harbor ties would considerably ease Allied supply problem.

### Railroads Carry Burden

The long lines of communications from the Brittany peninsula had brought no information beyond the bare announcement of the end of fighting at the port, entry point for most of the A. E. F. in the first World War.

News correspondents at supreme headquarters have been told repeatedly that "blanket security" prohibits any reply to their inquiries regarding the mystery of how the Allies have been able to supply troops on the German frontier through a single port—Cherbourg, now almost 500 miles behind the farthest advance to the east.

Le Havre, however, has now been in Allied hands for a week.

It is known that the Allies have scant hope of using the port facilities of Antwerp, still surrounded by a rear guard of stubbornly resisting Germans. The long Scheldt river estuary, which gives Antwerp access to the sea, probably is thoroughly mined and the Germans remain in considerable force along the neck of land flanking it to the north.

British and American engineering outfits have had better than usual success in rebuilding and operating French railroads and these now bear the greater part of the supply burden.

They are supplemented by truck convoys which wind endlessly

## Eindhoven Bombed During Celebration

BY ROBERT C. WILSON

Eindhoven, Holland, Sept. 20 (AP)—A German air raid that came last night in the midst of Eindhoven's celebration of its liberation by Allied forces left much of the center of the city and its residential section in ruins.

A dispatch from Aneta, official Netherlands news agency, said 65 were killed and 150 seriously wounded in the raid, made by 30 Nazi planes. The death toll was expected to rise, it added, because many persons were listed missing.

irty minutes before the attack, Eindhoven's citizens were bringing their British and Ameri-

cans Liberators, children danced in the streets and crowds were gathered around army vehicles so thickly that traffic had halted.

Then came a rumor that German tanks were moving on the city from the north and many of the inhabitants fled from the main streets. This rumor proved a lifesaving factor, for it was these streets which bore the brunt of the air raid.

Some tanks did get within shelling distance, but they were driven off by the British forces.

The air raid came suddenly and Eindhoven's air raid precautions were handicapped because the Germans had taken much of the fire fighting equipment when they evacuated the town. The city has no air raid shelters.

The raid was aimed at Allied communication lines which pass from Belgium through Eindhoven to the front line near Nijmegen.

It failed in this purpose, however, as Allied traffic kept moving northeastward.

Large parts of Eindhoven were an ugly shambles. The inhabitants were dazed. They had not expected to be drawn back into the war so soon. The Dutch flags they had brought out of hiding hung in tatters over the wreckage.

The raid was aimed at Allied communication lines which pass from Belgium through Eindhoven to the front line near Nijmegen.

It was the second heavy blow tossed at the Philippines since Gen. Douglas MacArthur achieved a new air base at Morotai, atop the Moluccas, 300 miles southeast of Mindanao.

The moonsoon front was so extensive some big bombers couldn't get through and, instead, dumped their explosives to the south on the Japanese garrison in the Talaud Islands.

## DUCK HUNTERS ENJOY OPENING

Teal, Widgeon, Blacks And Wood Ducks In First Day Bag

With fine cooperation from the weather an unusually large number of hunters enjoyed the opening of this year's 80-day duck season yesterday. Rain, a dark morning and some wind combined to provide a couple of hours of good shooting for the early hunters. Bags of the successful hunters ran from two to six or eight ducks.

As in the past Portage Bay was the concentration point for most of the hunters of this area. Conservation officers estimated that from 450 to 500 hunters were on the bay for the opening. Many hunters walked out, a good number used bicycles and 138 automobiles lined the road from the refuge to Fishery hill.

Local ducks made up the opening day bag with blue wing teal in the majority. A few wood ducks were taken as well as some widgeon and blacks. Few hunters reported killing mallards.

After the rain stopped the ducks quit flying well and gradually worked their way out into the bay. A large number drifted over to the refuge on Escanaba's south shore.

No opening day arrests and no accidents were reported here and conservation officers praised hunters for not shooting before the opening signal bomb. The bomb went off on time and with a report that was easily heard throughout the Portage area.

Although a few geese were seen over Little Bay de Noc on Tuesday no hunters reported bagging any on Wednesday. Few coot were in the first day bags as hunters kept their attention on the ducks.

In areas other than Portage the hunting was reported spotty, with the wind too light to keep the ducks moving.

## Dr. Birger Johnson's Father Passes Away

Dr. Birger E. Johnson received a cablegram Tuesday, advising him of the death on that day of his father, Andrew Johnson, of Farrelton.

Mr. Johnson lived in Escanaba for a number of years, returning to Sweden in 1901, and will be remembered by many of the older residents of the community.

He is survived by his wife and eight children, six in Sweden and Dr. Johnson and Mrs. W. Swedberg, of Minneapolis, in this country; and by one sister, Mrs. Charles Johnson, and one brother, John E. Johnson, both of Escanaba.

## Education In America Faces Greatest Crisis

BY JANE EADS

Washington, (AP)—American education faces its greatest crisis of the war as school gets under way this fall.

Fewer qualified teachers and fewer children will be filling the classrooms.

Some educators fear that unless we can get more and better-trained teachers into the Nation's schools we may have another lost generation" such as followed World War I.

Better pay is offered as one remedy for the teacher problem.

Reasoning with boys and girls that they will get better and longer-lasting jobs in the end if they go to school now is urged as a measure to hike up declining enrollments.

**Results of War**

Here's what Dr. Benjamin Frazier, U. S. Office of Education, told me about the war's impact on the teacher situation:

Through June, 1944, war emergency certificates given to emer-

gents totaled more than 76,300, more than double the number given last year. In normal times these teachers would not be regarded as fully qualified.

In November last year, 20,000 teaching positions were still unmet. Closed classrooms in October of last year numbered 7,700.

Teacher turnover last year doubled that of normal years, and teachers' colleges lost 65 per cent of their students in the past two years, thus reducing heavily the number of qualified teachers. How much worse these problems will prove this year is not known.

As for declining enrollments:

There has been a drop of more than 3,500,000 in all schools, public and private, from elementary on up through college and university, since the beginning of the war. Of this number not over 1,500,000 were due to falling population.

Alarmed especially over the large numbers turning away from high school—more than 1,000,000 in three years—the U. S. office of education and the U. S. children's bureau, with the endorsement of the War Manpower Commission, have been conducting an intensive national go-to-school drive.

For, they point out, simultaneous with the drop in enrollment was an upsurge in the number of children of high school age at work. Even when school was already in session, in October of last year, approximately 2,750,000 boys and girls, more than a fourth of the 14-through-17 age group, were working full or part time.

The purpose of the go-to-school drive is to enroll and keep the Nation's boys and girls of this age in school, either full-time or in a well-planned school-and-work program until they complete their courses.

More than 40 national organizations of educators, women, employers, workers, church people and other civic leaders are putting their support behind the campaign.

### Reasons for Decline

Reasons given by government agencies for children leaving high school are "temptations of money, prestige, patriotism and a feeling of helping their families and be-

only available crossings in the vicinity.

### Ruhr Valley Near

Nijmegen, a city of approximately 50,000, is situated on a high bluff on the southern bank of the river, and once Dempsey's main forces have crossed the way will be open to them through a rolling valley into the Ruhr, scarcely four miles to the east.

(The Free Netherlands radio in London reported that British tanks had crossed the bridge at Nijmegen, but there was no confirmation either from Allied headquarters or from field dispatches.)

Since the airborne invasion of Holland on Sunday, a strong force of Allied skytroopers has been fighting hard to enlarge a pocket in the Arnhem area, 10 miles north of Nijmegen on the Neder Rhine, north of and roughly parallel to the Waal Rhine. The German high command said this Allied force was under heavy attack from every side and that 1,700 prisoners had been taken.

Both at Nijmegen and east of Aachen in Germany Allied forces were within 55 miles of Essen, home of the great Krupp armament works and heart of the Ruhr.

### Patton's Men Slowed Up

Lt. Gen. George S. Patton's Third army was locked in a similar bitter struggle east of the Moselle river in northeastern France against German opposition.

described by headquarters as "heavy and determined."

American troops captured the village of Chatel on the east bank of the Moselle south of Nancy and seized an important road junction near Lunéville, 15 miles southeast of Nancy. Allied troops under Patton advanced eight miles in the Baccarat area southeast of Lunéville, but there was no report of gains in the main area of the fighting north of Nancy and near the German-held fortress city of Metz.

The Allied Seventh Army still was at least 12 miles from the Belfort gap entrance into the southern Rhine valley and was meeting steadily stiffening resistance.

## U. P. Briefs

### POWER COSTS RISE

Marquette—Shortage of water in Dead river, reservoir of "ammunition" which operates Marquette's municipal hydroelectric power plants, will cost the city thousands of dollars this year, it was stated yesterday by Stephen L. Garber, general manager of utilities and public works, who pointed to figures showing the cost of operating the Diesel emergency plant at the Powder Mill.

When the volume of water in

Dead river is normal the hydroelectric plants generate enough current to carry the light and power department's entire load, except during the winter.

The Diesel plant usually is shut down when the spring runoff occurs and is not operated at all for three or four months. During the late fall and winter it is operated during the peak load hours.

In 1943 the operating cost at the Diesel plant was \$5,079.22, Manager Garber pointed out.

### A. A. LILLYROOT DIES

Menomonie—Axel A. Lillyroot, 80, of Stephenson, a retired Chicago and North Western Railroad company hand, was found dead in bed early Sunday in the home of his daughter, Mrs. Carl Winter, with whom he resided. Death resulted from heart disease.

Mr. Lillyroot was born in Sweden, August 3, 1864, and went to Stephenson from Sister Bay in 1914. He retired from active duty about 20 years ago. Mrs. Lillyroot died in Sister Bay 35 years ago.

### Desert Rain Barrel

The barrel cactus of the southwestern deserts of the United States is known as the "rain barrel of the desert," since it can be used for both food and drink in emergency.

## BREST FALLS AFTER 46-DAY ALLIED SIEGE

(Continued from Page One)

### Trinity Luther League

Trinity Luther League of Stonington will meet in the parish hall Friday evening at 8 o'clock. Plans for the fall supper, which will be sponsored by the League on October 13, will be discussed. A program will be given and lunch will be served during the social hour.

Members and friends are cordially invited.

### Christian Science Churches

"Reality" will be the subject of the lesson-sermon in all Christian Science churches throughout the world on Sunday, September 24.

The Golden Text (James 1:17) is: "Every good gift and every perfect gift is from above, and cometh down from the Father of lights, with whom is no variableness, neither shadow of turning."

Among the Bible citations is this passage (John 1:1, 3): "In the beginning was the Word and the Word was with God, and the Word was God. All things were made by him; and without him was not anything made that was made."

Correlative passages to be read

from the Christian Science textbook, "Science and Health With Key to the Scriptures," by Mary Baker Eddy, include the following (331): "The Scriptures imply that God is all-in-all. From this it follows that nothing possesses reality nor existence except the divine Mind and His ideas."

### Prolific Pig

Ernest Goodin of Canton, Ill., owned a sow which bore a litter of 22 pigs a few years ago. During the preceding fall, the same sow produced a litter of 20, almost three times the size of a normal litter.

The earliest surviving written documents (clay tablets) of Babylon date from about 3,500 B. C.

## ICELAND HAS POSTWAR PLAN

American Bases Will Be Converted To Peace-Time Uses

BY PHILIP CLARKE  
New York. (P)—Iceland has emerged with the war a strategic stepping stone in Atlantic air and sea routes and its leaders and determined to maintain that importance after peace—independently.

Sveinn Björnsson, 63-year-old president of the two-months-old republic, who just has concluded his first official visit to the United States expects the United States to fulfill its pledge to withdraw its forces at the end of the war.

"We Icelanders are a nation of individualists and we did not establish our republic to become less independent," said Vilhjalmur Thor, foreign minister.

The huge bases, now garrisoned by American troops numbered by Björnsson in "the tens of thousands," would be converted to commercial air use, one member of the party indicated.

Commercial aircraft, flying the northern "circle route" between Europe and America, would find on Iceland some of the world's most elaborate air installations. Icelanders, after a brief period of inflation, have profited heavily from war traffic. They foresee continuance of this profit in peace-time channels.

One of the largest steamship lines in America recently filed application to establish a new route with Reykjavik, Iceland, an important port to be served.

Almost midway between the eastern and western hemispheres, Iceland has divided its interests between both. Björnsson recalled that a lively business existed between Iceland and the United States during the first World War and for two or three years afterward. Then it stopped but island officials do not expect it to happen again because the commerce has been on a much larger scale than ever before.

Those relations can be judged from the value of exports from the volcanic Little Island in the past five years. In 1939, exports totalled an estimated 69,654,000 kronas (one krona equals about 15 U. S. cents.) By 1941 the exports reached 188,564,000 kronas, nearly two and one-half times the 1939 total. Exports have continued to increase steadily.

When British forces landed in Iceland in 1940, Britain agreed to take all the island's goods at high prices. When U. S. troops took over guarding this vital North Atlantic outpost in July, 1941, arrangements were shifted to this country.

Fish now makes up the bulk of Iceland's shipments to the United States. Much of it is re-shipped to Britain under Lend-Lease.

Recently Iceland made its first shipment of frozen trout to New York for civilian consumption. This may prove the forerunner of

**FOOD FOR VICTORY**—Community canning projects, like this one at Stephenson, are making an important contribution to victory by assuring an adequate supply of food for both civilian and military needs. The supervisor of the food canning program at Stephenson is E. Walfrid Granskog.

formerly of Stonington, who is at the extreme left in this picture, checking a gauge on one of the large pressure cookers. Mrs. Myrtle Corey, the instructor, is in the center of the picture, the second woman from the left. Patrons of the canning project prepare the food for processing in metal cans.

## Canning Project Helps Farmers At Stephenson

A cooperative canning center, sponsored by the Stephenson public schools and the state board of control for vocational education, has resulted in the canning of 8,000 quarts of produce, both fruits and vegetables, for residents of the Stephenson area. E. Walfrid Granskog, supervisor, has announced. The canning project is a part of the rural war training program directed by Granskog, a former resident of Stonington.

The canning facilities are available without charge to anyone. The pressure cookers, with a capacity of 33 quarts or 45 No. 2 cans, are provided by the state, along with the sealing equipment needed to seal the cans. Bottled gas also is provided by the state for use in the canning center and about 40 pounds are used daily.

Specifically, the canning project is designed to promote the production, conservation and processing of food for family use as a war training course. The work of preparing the food for canning and the canning work is done by the local residents who participate in the canning program. Mrs. Myrtle Corey, Instructor, assists in the work by providing information on the correct methods of canning.

Most of the canning at the project is done in metal cans, which

a lively postwar trade, much of it transported in huge flying boxes.

### Non-Leather Shoes With Rubber Soles Are Ration Free

The Office of Price Administration has announced a change in its shoe rationing regulations which will free from rationing any non-leather shoes made with rubber soles.

Shoes containing leather remain on the rationed list, regardless of whether or not they have rubber soles. No change is made in the regulation covering men's rubber boots and rubber work shoes.

The action will not release from ration control any considerable quantity of shoes now in dealers' stocks. Rather, it means that non-rationed types of shoes—the kinds made with canvas or other fabric uppers—will now be permitted to be made with rubber soles.

This change in ration regulations is coordinated with recent actions by the War Production Board and the Office of Rubber Director to relax control of rubber for shoes. Previously, shoes with rubber soles were included in the ration order because of the scarcity of rubber. Now that the supply of reclaimed rubber and Buna-S, the all purpose synthetic rubber, has increased substantially, rubber soles are readily available for all types of shoes.

### More Sailors Are Needed for Vast Merchant Marine

Former merchant seaman or Great Lakes sailors now employed in shore jobs are vitally needed now to man the vastly expanding merchant marine, Captain Joseph E. Johnston, national field representative of the War Shipping Administration, has reported.

Capt. Johnston, who arrived here yesterday to interview seamen regarding their availability, will be in Escanaba all day today at the United States Employment Service office.

He emphasized that statements of availability will be issued to those who qualify and that reemployment rights and retention of seniority are guaranteed to all seaman who leave shore employment for service in the merchant marine.

Any persons with three months experience or more on the Great Lakes or salt water 16 to 18 years of age, or over 26 are eligible. Persons between the ages of 18 and 26 also are eligible if they are classified 4-F, 1-C or 1-AL in the draft.

The need for merchant sailors is great now but will be further expanded when the war ends in Europe and the weight of Allied power is shifted to the Far East for action against Japan. Employment for a longer period in a higher net income than is presented in any shore employment is promised in the merchant marine, Capt. Johnston reported.

### Van Meer

Van Meer—The Van Meer-Melstrand PTA met at the schoolhouse on Friday evening. It was voted to hold a fall festival and a book social on October 27. Mrs. Harold Gamble and Mrs. Irma Stebbins were elected chairmen of the entertainment committee and Mrs. Fern Chartrand and James Worthing of the executive committee. A canning bee will again be held to help with the hot lunch project. It will be held at the school kitchen early in October.

The Van Meer-Melstrand 4-H club will hold a weiner roast at the schoolhouse on Friday evening. A local achievement day will be held at Van Meer for the club here and at Shingleton.

A large gravel plant has been moved into the T. N. Belfry farm across the road from the schoolhouse. Much machinery is being used and gravel prepared for the re-surfacing of the highways in this area.

Mrs. Otis Syers came from California where she has been with her husband, to visit his parents, Mr. and Mrs. Ralph Syers.

## Legion Drafts Postwar Plans, Picks Commander

Chicago, Sept. 20 (P)—The American Legion drew their pattern for a postwar United States today.

Before concluding their 26th annual convention by electing Edward N. Scheiberling, Albany, N. Y., attorney, as National commander, the Legionnaires adopted resolutions recommending:

Unconditional surrender and permanent disarmament of Germany and Japan, with opposition to a "soft peace."

An association of free nations "implemented with whatever force may be necessary" to maintain peace and prevent recurrence of war;

Immediate enactment of legislation for universal one-year military training of qualified young American men, upon expiration of the Selective Service Act;

Continued control of Army and Navy bases needed for national security, maintenance of an American Navy capable of combatting "any probable combination of hostile ships," and "vigorous opposition" to scrapping any first line ships, and

Support of the "free enterprise" system, "with government control limited," and "prompt and sympathetic administration" of the legion-supported G. I. bill of rights.

The sale of four lots on Lake Shore drive at Fifth avenue south, the site of the late John K. Stack Sr. family home, was announced yesterday by Henry M. Stack.

The property was sold by the John K. Stack Company to Mr. and Mrs. William Ehnert of 1015 Ludington street, and Dr. and Mrs. V. J. Lang of 625 South 16th street. The Ehnerts have purchased two lots on the north side of the area, fronting on Lake Shore Drive. The Langs have purchased two lots on the south side, with frontage on Lake Shore Drive and Fifth avenue south.

Both the Ehnerts and the Langs propose to build homes there after the war.

Ownership of the property had been in the Stack family for about 60 years. The John K. Stack Sr. home was built there 57 years ago and was one of the largest and finest residences in Escanaba. It was razed about two years ago and the property divided into lots for sale as home sites.

## CLOSED SEASON STARTS OCT. 1

Chubs, Lake Trout And Whitefish Are Affected

Closed seasons on taking of lake trout, whitefish, and chubs from Michigan waters of the Great Lakes begin October 1, according to a conservation department announcement.

Closed season on lake trout, including ciscoe, is October 1-31 for Lake Huron, October 10-November 4 for Lake Superior, October 10-November 10 for Lake Michigan. For whitefish, dates are November 1-December 1 for Lake Huron, November 1-26 for Lake Superior, November 5-December 10 for Lake Michigan, December 1-March 10 for Lake Erie. For chubs, dates are October 15-November 20 for Lake Huron, October 15-November 10 for Lake Superior, October 15-November 20 for Lake Michigan.

The department has issued instructions for handling of fish eggs secured prior to and after reopening of the seasons, which are established to protect the species while spawning. No permits to fish for spawn during closed seasons will be issued.

England's Bill of Rights was enacted in 1689.

### None Is Indispensable

PROBABLY one of the most devastating arguments against the reelection of President Roosevelt was offered by Gov. Thomas E. Dewey in his Portland speech when he declared "the peace we seek must not hang by the slender thread of personal acquaintance of any two or three men."

The New Dealers have made much of contacts that President Roosevelt has had with Winston Churchill and Josef Stalin as fitting him for the task of winning the peace. But whether we take the right course in the postwar era will not depend upon any "indispensable" man. It will depend upon the unity of the nation, with the people agreeing wholeheartedly with the role that America proposes to play in the shaping of the new world order.

At the present time, there is a glaring lack of unity in this country. It comes from a lack of confidence in a New Deal administration, which has made a lot of mistakes and has held office too long for its own good and that of the country as a whole. In other words, it is time for a change.

### Movement to Be Small

MANY of the hundreds of thousands of soldiers and war workers who are now planning to buy farms after the war will not be able to get them, according to government surveys of the situation.

The survey shows that no more than 50,000 farms will be for sale or rent due to retirement of older farmers in the years immediately after the war. A much greater number of farmers will give up farming, but in most cases these farms will be passed on to sons or relatives.

To these 50,000 farms may be added perhaps 10,000 farms made available by government disposal of three and a half million acres of farm and range land bought up for army and camps and other military uses.

The most important source of new farms for veterans and war workers may be the large-scale irrigation projects now under way or being planned for the western states. According to government estimates, 135,000 family-sized farm units could be developed within a few years by irrigation. Work on some of these projects, such as the Columbia river basin project, is already well advanced. Others await approval by Congress.

Top estimates of new farms available from all sources to supply our one million would-be farmers within three years after the war do not exceed 200,000. This would provide farms for one out of every five. The task of helping even this number of new farmers to settle successfully on the land is a formidable one.

The recent hearings on postwar agriculture held by the house committee on post-war economic policy have emphasized the fact that American agriculture can absorb new farmers only if there is a full market for the produce of all farmers. The level of employment and the development of new markets and new uses for farm crops will determine whether these veterans and war workers who turn to farming will make a living for themselves and their families.

### Escanaba Leads Way

ESCANABA is among the few communities in Michigan that have submitted proposals for public improvements to be undertaken whenever there is a need to furnish temporary employment after the war is over.

As a result, the state administrative board has released special funds to this city to finance the completion of plans for a number of projects. These allotments include \$600 for drawing the plans for a \$30,000 bathhouse at Ludington beach; \$1,380 for planning an estimated \$138,923 water main project; \$1,071 for a \$85,923 steam main project, and \$538 for an estimated \$55,800 elevated storage tank project.

Escanaba is benefiting from a fund set up by the state legislature to encourage communities to do early planning for the postwar period. The money is being allotted with a view of averting a repetition of the leaf-raking projects, which were hurriedly started in many communities when many persons were thrown out of work during the last depression.

Escanaba will be ready with constructive projects that will furnish improvements that are needed and must be undertaken, anyway, if this city is to continue to progress as it has in the past.

### Civil Liberties

CIVIL liberties traditionally have been precious things to Americans. We have taken for granted certain rights that some people have never known and would never think of demanding. But to us they have been of the essence of the things that make life worth living.

It was to safeguard them that the first

Congress of the United States 155 years ago, in response to widespread popular demand submitted to the states the federal Bill of Rights. They embedded in the Constitution basic principles of freedom for which our ancestors had fought through bitter years.

But it is disturbing to learn that only 23 per cent of the individuals interviewed by the National Opinion Research Center knew what the Bill of Rights is. It is doubly disturbing because we are in a time of transition. When wartime tension gives way to an era of peace the question of relaxing wartime restrictions on freedom will arise. Unless our citizenry has a clear idea of what its civil liberties consist of, it will be confused and bewildered—especially when the extension of those liberties to other parts of the world is considered.

### Forests in Alaska

CLAIMS by the people of Alaska that their homeland has boundless forests that could be exploited to provide much needed wood pulp for American industries are to be checked with a systematic survey by the U. S. Forest Service.

The northern territory has a large supply of hemlock and spruce, located near streams which could float the timber to mills like in the early days of lumbering in the Upper Peninsula. Spruce could go into pulp for paper, and hemlock into pulp for rayon and similar products.

Alaskans have long contended that their resources have gotten insufficient consideration, all of which has held the northern territory from becoming a prosperous industrial empire. A survey will reveal whether the Alaskan boosters are giving a true picture of their timber resources, and if their claims are found to be correct we shall have to worry less about the rapid wartime depletion of our forests in this country.

### Other Editorial Comments

#### GERMANS IN WOODS (Iron River Reporter)

German war prisoners working in the woods of Iron county would have been a concept deservedly ridiculed five years ago. Yet the reality announced this week caused merely a ripple of interest, following as it does by several months the importation of prisoners to the upper peninsula for woods work last fall.

Bringing an additional thousand or more prisoners to the upper peninsula for woods work emphasizes two existing conditions—the critical shortage of manpower in the face of unprecedented demand for wood products, and the willingness of the logger and the army to use Germans for cutting pulpwood.

Examined further, it is apparent woods workers cannot be recruited in any numbers for the upper peninsula outside its own territory for the work requires some skill and a willingness to live in loneliness, and furthermore, that the German prisoner has been productive in the two or three camps where a trial experiment was conducted.

The early experience of the upper peninsula logger with the German war prisoner was not a happy one. There were charges of sabotage originating in large equipment losses. The relations between the logger and the army, while pleasant, were strained at times until the system reached a semblance of coordinated effort. The army was still studying the psychology of the young Nazi indoctrinated German soldier and what treatment would be most productive. The prisoners themselves were put to a new task.

No wonder, then, that the first few weeks of the experiment were filled with misgivings and that loggers were ready to brand it a failure. Only the critical need of men in producing timber for the war effort and the incentive of high prices kept it going.

Neither the army nor the logger is satisfied with German prisoner labor in the woods and they would be replaced quickly if the American woods worker was available in the right numbers. War Manpower officials said prisoner labor was "quite satisfactory," indicating it is a war expedient to be endured as an emergency measure.

The general public soon will have a chance to buy 30,000 vehicles from the Army. We know how that will strike us—if we don't jump.

### Take My Word For it . . . Frank Colby

#### SURPRISE WORD OF THE WEEK

There is no such word as "hari-kari," even though the N. B. C. Handbook of Pronunciation lists it, apparently with a perfectly straight face.

The correct word is HARA-KIRI. Its literal Japanese meaning is "belly cutting."

Hara-kiri is a method of committing honorable suicide by drawing a knife across the belly and ceremoniously bleeding to death. No oedum is attached to hara-kiri by the Japanese. Indeed, the Nipponese prepares for the act quite cheerfully.

Clearly, therefore, the decisive task is to win domination of the skies, no matter how that task is complicated by outmoded surface operations. The war in the Pacific is an aerial war. It has unfolded so well under surface leaders only because they have on their staffs men with the requisite knowledge and experience to carry on air warfare.

But, let it be noted, the suicide does not commit "Harry Carey." The correct pronunciation of the word is:

HAH-rah-KEE-ee

In modern Japan, the word SEPPUKU is preferred to "hara-kiri." Its meaning is the same, and it pronounced: SEP-oo-kuu.

Any other form of suicide is called JITSATSU, pronounced: JITS-sah-soo.

Conference: Recently you said that the preferred American pronunciation of bureaucracy is "bew-ROCK-ruh-see." But my Webster's, published by Publishing Company, shows the third syllable only as "roe." How about it?—E. E.

Answer: If you will examine your so-

## World War In The Air

BY MAJOR A. P. de SEVERSKY

The Quebec Conference ended without naming a Supreme Commander for the Pacific theatre of war. The explanation offered by Messrs. Roosevelt and Churchill was that geographical and supply problems make an overall command unwise at this time.

The explanation is proof that the topmost Anglo-American leaders still view the Pacific war from the surface, through the eyes of ground generals and admirals. Thus viewed, of course, geographical and supply factors are indeed unsuited for a single command.

For instance, both land and sea operations are involved, and the differences between them are enormous.

One when the war is viewed from the vantage point of air power does the importance of a unified command become apparent. The differences then disappear, since the entire struggle comes down to the single task of conquering the whole air ocean over the Pacific and Asia.

#### AIRMEN FAVOR UNITY

That is why airmen favor a unified command—provided the Supreme Commander is an airman. And when we speak of an airman, we do not mean a general or admiral who has acquired wings in his forties in order to meet statutory requirements to command air units. We mean someone who has devoted his whole life to military aeronautics; who has had combat experience in this war and the last one; who is capable of evolving a genuine air strategy and implementing it with the necessary equipment and tactics.

We mean, to make the idea more concrete, airmen of the calibre of leaders like Generals Kenney, Spaatz, Chennault.

The fact that the Pacific war is still regarded as a series of struggles shows that military thinking is still miles behind military realities. The prestige of surface ideas weighs too heavily in the scale. All the same, history will record what is obvious to the air-minded: that the Pacific conflict from the outset resolved into an aerial struggle—into a contest for air bases.

We have been conquering bases in order to be able to conquer some more air bases, so that ultimately our air power could strike at Japan. When we possess appropriate air bases around Japan, we shall subject that country to aerial offensive, to destroy its airfields and with them Japanese air power.

Once command of the air over Japan has been established, that nation can be finished off from the skies or by invasion. If the latter course is decided upon, then surface forces will be able to proceed just as easily and with as little loss of life as in the invasion of Europe where, likewise, we operated under skies dominated by Allied air power. The surface action will be a follow-up procedure, strictly according to the textbooks and requiring no special genius. The genius is needed to gain control of the entire air ocean over that theatre, including the Japanese home islands.

Throughout the Pacific campaigns, whether Nimitz or MacArthur was in command, the first and decisive step has been to neutralize a Japanese position. And air power—air power alone—has had to do that. The fact that this air power takes off from land in one instance and from carrier decks in the other does not alter the picture. Once it becomes air-borne, the tactical procedure for air power is the same. If there are differences in practice, they are not intrinsic but simply reflect the Army and Navy insistence upon doing things differently.

#### SAME PATTERN FOLLOWED

Every major engagement in the Pacific follows the same pattern: Air power neutralizes a position, then surface force moves in under aviation protection. In the case of General MacArthur, cruisers, destroyers and small vessels usually support the invasion. In Admiral Nimitz's case, things are done on a more lavish scale: A few battleships add to the aerial barrage by pumping shells into the fortifications. In both cases, once the position is taken, engineers or seafarers proceed to build more airfields for our air forces—to enlarge the size and effectiveness of the aerial umbrella we are carrying nearer and nearer to the enemy homeland.

The Army, after a base is conquered, has no further need for warships. Air power provides the necessary "sea power," with naval vessels acting simply as transport equipment. The Navy's procedure is more complex. Its "bases," the carriers are highly vulnerable, needing protection not only from land bases but by battleships. These must be shielded by cruisers, the cruisers by destroyers. Since small bases cannot accommodate all this force, what are in effect artificial naval harbors have to be floated to the site. Thus we park substantial slices of our hundred-billion naval investment alongside some coral reef to protect a handful of airplanes so we can go ahead and acquire another base for air power.

Take for instance a verse written by a Pvt. Ray Hayes, otherwise unknown. He calls it "A Hitch in Hell," and Staff Sgt. Buchko sends copy to his sister, Zita Buchko, who is employed at St. Francis hospital. It's the lowdown on what G. I. Joe thinks of the land down under, and goes this way:

I am sitting here thinking of what I left behind.

And I'd hate to put on paper what's running through my mind.

We've dug so many ditches, and cleared so many miles of ground.

A neater place this side of hell, just cannot be found.

There is a certain consolation though, so listen while I tell—

When we die, we'll go to heaven, cause we've done our hitch in hell.

called "Webster's," you will find this notice on the frontispiece: "This dictionary is not published by the original publishers of Webster's Dictionary or by their successors." All accepted authorities, except Funk and Wagnalls, give preference to bew-ROCK-ruh-see.

## Not Quite Empty but Pretty Low Down

### Good Morning!

By The Bugler

WORRY, WORRY—The girls of America with boy friends in service overseas are becoming alarmed over the treatment their foreign sisters are according the conquering heroes.

For one thing they have seen the news pictures and the news reels. They see G. I. Joe getting kissed on both cheeks by enthusiastic French girls who are overjoyed at being liberated. They are disturbed by reports that these same Oo-la-las! are adept in the use of makeup and are dressed stunningly as only (they say) the French girl can dress.

It was the same in Italy. The brazen hussies who were liberated from the Nazis were too expressive in their gratitude. It made the American girl friend chew her finger nails to see the goofy smile on the boy friend's face while he edged up for a snack from one of Mussolini's late protégés.

They were not so worried so long as G. I. Joe was in North Africa. There, they thought, he was a little safer from feminine wiles. For after all, what man can be caught and held for long by an unknown quantity hidden under an awning?

THE SOUTH SEAS — What Nordhoff and Hall did for the South Seas in the way of adventure yarns, Hollywood and Dorothy Lamour added to with a generous splash of glamour.

The Yankees have always supposed that the South Seas is a place to lie around in the golden sun, warmed by perfumed zephyrs and the glances of native maidens. It is there (we thought) that exotic flowers floated on placid lagoons and the night thrrobbed with the rhythm of sweet music and swaying brown bodies.

It was colossal, it was stupendous—and it wasn't true!

We are getting the truth at last, for G. I. Joe, who is no professional romanticist driveling for the delight of a publisher, is telling the truth about the South Pacific. He looks at the palms, the pandanus and the pal-pot, and finds it doesn't compare well with Main street's scenery or Mike's hamburger joint.

And the Polynesian beauties—well, they're toothless hags at 21, and before that ripe old age most of them have sores on their feet and a bad case of pyorrhea.

The Army, after a base is conquered, has no further need for warships. Air power provides the necessary "sea power," with naval vessels acting simply as transport equipment. The Navy's procedure is more complex. Its "bases," the carriers are highly vulnerable, needing protection not only from land bases but by battleships. These must be shielded by cruisers, the cruisers by destroyers. Since small bases cannot accommodate all this force, what are in effect artificial naval harbors have to be floated to the site. Thus we park substantial slices of our hundred-billion naval investment alongside some coral reef to protect a handful of airplanes so we can go ahead and acquire another base for air power.

# RAILWAYS PLAN SMOOTH TRAVEL

Will Meet Competition With New Cars And Lowered Fares

BY S. BURTON HEATH  
NEA Staff Correspondent

New York—A thorough face-lifting job is being planned for the nation's railroads, to begin just as soon as production facilities are available for peace-time manufacturing. Rail lines are preparing to meet competition of airplanes, buses and private transportation with an aggressive bid for the enormous travel business that most observers predict.

Lower fares are predicted, with cost per mile estimated at 1 to 1 1/2 cents for coaches and 2 cents for Pullman. Present rates are about 2 cents in coaches and 3 cents in Pullmans.

Beauty treatment for rail lines will see ancient coaches replaced with lightweight, air-conditioned cars. Split-reclining seats, good lighting, adequate luggage space and washrooms will be features of smoother-riding, quiet cars. Post-war coaches will be so comfortable that many roads think Pullman chair cars are on the way out since they will not attract enough patronage.

## Old-type Sleeper Extinct?

The Pullman Company believes now that the day of the old open-section sleeper, for the premium-fare trade, has passed. Probably no more will be built. Those now in use will be shifted to the cheaper tourist-pullman trade. They will be supplemented—for those who want to travel overnight inexpensively—by the new three-tier sleeper. Four experimental three-tier units have been in military use during the war on a transcontinental line.

For those able and willing to pay a premium price for de luxe Pullman accommodations, a private room may be provided for the charge now made for a lower berth. This would be in a new duplex roomette car. One has been in use throughout the war on the Pennsylvania Railroad's Washington-to-Chicago run. It has proven popular, but experience has suggested 106 improvements and refinements that are being incorporated in a second car now under construction. Bedrooms, compartments, drawing rooms and other de luxe types of travel space will be continued.

Not even the lowly, harassed commuter is being ignored. Pullman has announced a new "Three-dex" commuter coach with 96 open-car seats and four card rooms, improved luggage space, air-conditioning, better lighting and all-around greater comfort.

The latest innovation ready to go into manufacture as soon as wartime restrictions are lifted is a new dinette with the tables arranged diagonally so that any person at a table can enter or leave without disturbing others. It will have tables for four and tables for two, air-conditioning, "vibrationless tables" free from water bottles, extra lined and silver, inter-car telephone service and improved spot-ray illumination.

These are not all of the improvements that are being discussed by railroad and Pullman executives in an effort to make railroad travel cheaper, more comfortable, faster—or all three—than competing transportation services.

They are just a few which have progressed so far that they can be expected to appear soon after the war ends.

## Violets Bloom In Autumn Woods

Van Meer—We think of violets as being a spring time flower but at least one kind of violet blooms almost every fall that rains come to revive the dryness of the late summer. This is the long stemmed pale, wood violet. This year it is putting forth its late bloom in profusion throughout the hard-woods. A bouquet of violets can be enjoyed right up to freezing weather.

Railway sleeping cars were introduced in America by Andrew Carnegie.

## Gov. Saltonstall Will Be Elected To Senate

BY MARQUIS CHILDS

Boston—If anything is certain in the uncertain business of politics, it is that Governor Leverett Saltonstall, the spare, slow-spoken Yankee who has been chief executive of the Commonwealth of Massachusetts for six years, will be elected in November to the United States Senate.

He is an illustration, perhaps the chief illustration, of the kind of local strength on which Governor Dewey is counting heavily to pull the National ticket through. Such ornaments are pointed to with pride by GOP orators as typical of the achievements of the party.

Actually, while Saltonstall is a good Republican, his present prominence has little to do with Republicanism. His popularity blurs over party lines, and he will owe his election this fall almost as much to Democrats as to members of his own party. You feel here in the capital of New England what seems to be true pretty much all over the country—that Dewey lines and party lines and party designations mean less and less.

### Triumph of Character

Leverett Saltonstall represents the triumph of character, yes, the triumph of New England character. Both those names go back to early Colonial history. They add up to prestige and power here where family position, together with inherited wealth, count for so much.

Yet when you see Saltonstall, you feel at once that he has never leaned on inherited position. His has been the simply way of duty. He has done his duty as governor, giving this state a decent, efficient administration.

He has done his duty in this war—not merely his obvious public duty, but in every possible private way. Governor Saltonstall and his wife are both, for example, Gallon blood donors. Your run-of-the-mill officeholder might have gone to the blood bank once and been duly photographed and that would have been the end of it.

Two months ago, word came that the Saltonstalls' youngest son, Marine Sergeant Peter B. Saltonstall, was killed in action in the Pacific. The governor's schedule that day called for his presenting a posthumous award to the mother of a soldier. He went through the ceremony in a way that profoundly moved all those who saw it; his own feelings disfigured, yet inescapably there.

In his light, clean office, he seems at first a little solemn. He has the look of one of those tall wading birds you see standing up out of a swamp with poise and dignity. But his friendliness comes through, like the sun showing on a bleak Christmas day.

One thing that riles him is the talk of anti-semitism in Boston. It isn't fair, he says, to put that interpretation on the few outbreaks of hoodlumism that have occurred.

### Opposed by Corcoran

In the contest for the senate, Governor Saltonstall has a Democratic opponent. Most people, however, can't remember his name. They say, "Let's see, now, what's the name of that fellow who's running against Saltonstall."

His name is John H. Corcoran, and he's mayor of Cambridge. It is a fairly empty office, since Cambridge has a city manager form of government. Saltonstall speaks of him with respect. He was a class behind the governor at Harvard, class of 1914, although, of course, they didn't know each other then. His wife was Stewart from Newton, and since the Saltonstalls have always lived in Newton, that is a friendly connection.

It's still perhaps too early to say whether Saltonstall can carry the Dewey-Bricker ticket along with him. The polls show Massachusetts on the Democratic side.

Childs

## Blue Tokens Valid In Groups of Ten, OPA Office States

Blue tokens are now valid only in groups of ten. District Director Lawrence L. Farrell, reminded housewives as retailers have stopped giving blue tokens as ration change.

After Saturday, September 30, blue tokens will be of no value to the consumer.

Ration change for blue stamps is unnecessary now, OPA pointed out, because the new point values for processed foods effective Sunday have been set in multiples of ten.

From now until September 30, if housewives have fewer than

ten tokens, they may pool their blue tokens with a neighbor to make ten in order to obtain rationed processed food.

Although, after September 30, housewives cannot use their blue ration tokens, retailers have an additional 9-day period in which to dispose of their tokens.

Through October 9, retailers can deposit blue tokens in ration bank accounts, or exchange them in multiples of 250 for a ration check at a ration bank, or exchange them at local War Price and Rationing Boards for other forms of ration currency. Beginning October 10, OPA said, growers cannot use blue tokens at all.

Ration banks have stopped issuing blue tokens to retailers since they are no longer needed for ration change.

## SCOUT GROUPS PLAN PROGRAM

First Roundtable Meeting Of Year Held Here Tuesday

Emphasizing scout programming and scout advancement, representative Boy Scout groups held their first round table meeting Tuesday evening in the council chambers of the city hall. Scoutmaster, cubmaster, den mothers, committee men, board of review members

and scout commissioners attended.

Definite programming of activities within the scout and cub groups was suggested. Advancement was discussed in relation to courts of honor and boards of review. The point was stressed that the advancement program should be made attractive and that scouts and cubes should be advanced as rapidly as they qualify for the honor.

Boards of review will be held each month, it was decided, and the first court of honor will be held sometime in November. During the present war emergency courts of honor will be conducted in the local areas where troop or troops operate.

In the Cubbing field proper recognition of the Cub's advance-

ment, his entrance into the Boy Scout troop and his own accomplishment were recognized as important.

Attending the meeting from Escanaba were Frank Hirn, Lyle J. Shaw, Harry Reynolds, A. V. Aronson, Clarence Zerbel, Stanley Johnson, Marcel Ashland, Howard Dufor, John E. Edick, R. C. Shaw, R. L. Clayton, Capt. Milton Anderson, Ted Baldwin and Louis Linden.

Bark River was represented by Ray Raymond, Roy A. Bergman, John Barr, Jr., Ben E. Douglas, Bert Paquette, Mrs. Albert E. Johnson and Mrs. Dan Levesque.

France developed the use of the mechanical semaphore in Napoleon's time.

It's often true that when you buy a dress, it may, or may not, be a great success. But here's a way to be completely sure:

## St. Nicholas

In France

St. Nicholas—Pvt. George Van Damme is now in France according to word received by his parents, Mr. and Mrs. Jules Van Damme. Prior to being sent to France Pvt. Van Damme participated in the Sicilian battle and in Italy. While in Italy he visited the catacombs and St. Peter's Cathedral and had an audience with Pope Pius XII.

Pvt. Van Damme sent home some very interesting souvenirs from both Sicily and Italy.

Pfc. Walfrid Lindberg returned to his base at Dayton, Ohio, following a three day leave spent with his wife, the former Inez Barron at the Dona Barron home.

Mrs. A. J. Vermote and son, Alphonse left Monday morning for Hillsboro, Texas, following a six-month stay at the Henry Vermote home. Enroute they will visit with friends in Chicago.

Mr. and Mrs. Francis Roy of Escanaba, Mr. and Mrs. Alphonse DeMenter and Mrs. August Braswick of Gladstone visited at the home of Mr. and Mrs. Jule Bruntjens, and with other friends, Sunday.

An A. A. A. meet was held Saturday afternoon at Jule Van Damme's where farmers procured their Dairy Feed Adjustment payment. Frank Braender was in charge.

Mr. and Mrs. Peter Vermote and children Cherie and Jacqueline, spent Sunday in Flat Rock at the Jules Duchaine home. They also visited with Mrs. Vermote's brother Joe Duchaine who is a patient at St. Francis hospital.

Mrs. Patrick Van Eyck, the former Irene Bruntjens is in New York for a visit with her husband who is in the United States Navy.

## POTATO YIELD TO BE LARGE

Upper Peninsula Survey  
Indicates Banner  
Tuber Year

Following an inspection of Upper Peninsula certified potato fields, Prof. H. A. Moore, Michigan State College potato specialist, asserted that all indications point to a banner year for Upper Peninsula potato growers.

He declared that he estimates conservatively that at least 75,000 more bushels of certified seed potatoes will be produced in the Upper Peninsula in 1944 than the previous year.

Certified seed potatoes make up a very small portion of the peninsula's total potato production, although acreage planted to certified seed potatoes, as well as yield per acre, has been on the increase. The total number of certified seed growers in the peninsula jumped from 78 in 1943 to 98 this year.

At the end of 1943 there were 103 Upper Peninsula potato growers who had joined the select group of those who produced 300 or more bushels to the acre.

### Acreage Increased

A recent survey showed that acreage planted to potatoes in the peninsula increased from 24,759 in 1943 to 26,780 in 1944. During 1943 there were 1,946 growers with three acres or more and 326 with 10 acres or more.

Last year saw the peninsula ship out of the territory a total of 1,244 carloads of spuds, of which 92 carloads were certified seed potatoes. All these potatoes were marketed outside the peninsula. Houghton county shipped the largest number of ears, with Menominee, Delta and Marquette following in the order named.

George E. Bishop, Secretary-Manager of the Upper Peninsula Development Bureau, who announced the survey figures, pointed out that there are 44 potato warehouses in the peninsula, with an aggregate capacity of 1,700,000 bushels. These figures included only warehouses with a capacity of 10,000 or more bushels.

In 1945 it was estimated that \$155,000 was spent by Upper Peninsula potato growers for commercial fertilizer and \$77,664 for spray material. It was estimated that during the past 10 years Upper Peninsula potato growers have spent \$964,555 for planting, cultivating and harvesting machinery. During that period, growers of Houghton county alone spent \$500,000 for those items, with Marquette, Delta, Gogebic and Menominee following in the order named.

"These figures," Bishop declared, "indicate the immensity of our growing potato industry and its importance to the business man, the banker, transportation interests and to labor."

### 1,200 Carloads Shipped

In addition to the more than 1,200 carloads shipped out of the peninsula, the survey showed that 152 carloads of commercially grown potatoes were consumed in the Upper Peninsula, without taking into account the many victory garden and back yard garden plots.

"These figures show the increased importance of what is perhaps the peninsula's most important cash crop," Bishop went on. "These figures reflect credit upon the agricultural leaders, the farmers, Michigan State College and the transportation interests who have built this industry. State records have been broken for production by Upper Peninsula farmers year after year, indicating the adaptability of soil and climate here for the growing

AT LIONS ANNIVERSARY — Charter members of the Escanaba Lions club, who received their tenth anniversary chevrons at the Lions birthday celebration Monday evening. Beginning at the left they are A. J. Goula, James Frenn,

## News From Men In The Service

With the Fifth Air Force, Southwest Pacific Headquarters, Far East Air Forces, have announced the promotion of Harold E. Peterson, brother of Mr. Peterson of 602 North 10th St., Gladstone, Mich., to the rank of First Lieutenant. Lieutenant Peterson is a pilot with a light bombardment unit of the Fifth Air Force in the Southwest Pacific theatre.

Lieutenant Peterson nicknamed "Pete" has named his ship the "Gladstone Flash". Lieutenant Peterson was born on June 15, 1920 at Gladstone, Michigan. After graduating from Gladstone High School in June 1938 he opened his own restaurant in Berwyn, Ill. On October 10, 1941 he enlisted in the Army and entered cadet training in September 1942 at Maxwell Field, Alabama. He completed his pilot training at George Field, Illinois and received his wings on May 28, 1943. Recently returning from a

leave, Lieutenant Peterson brought back with him a pomeranian which he calls "Pom Pom". "Pom Pom" can now always be seen following "Pete" three times a day to the mess hall and has already received the nickname of "Chow Hound". "Pete" proudly tells everyone that "Pom Pom" has four operational hours to his credit and has been racking his brain to design a parachute and Mae West for him.

Sgt. Maurice La Vigne, son of Joe La Vigne of Nahma, is now somewhere in France, cooking for the general staff. Sgt. La Vigne left for overseas duty 4 years ago this month. He was first stationed in Iceland, then England and now in France.

Sgt. La Vigne Pfc. Morrison

Pfc. Richard Morrison of the U. S. Marine Corps is now at a rest camp somewhere in Hawaii. He has been in service the past 15 months and has been in active duty in the South Pacific, first returning from the battle of Saipan. He was 20 years old this month and the son of Mrs. James Nepper of Isabella. Mrs. Nepper has another son in service, Norman Morrison Cox, 2/c of the U. S. Navy. He has been stationed in the Hawaiian Islands the past 23 months. Recently seven boys of Isabella, Ensign and Nahma had a get-together; Allen Show, Robert Beveridge and Norman Morrison of the U. S. Navy, from Isabella; Richard Morrison a marine, of Isabella; Bert Johnston also of Navy from Ensign; Clinton Phalen and Lt. (j.g.) Jack Tobin of the U. S. Navy from Nahma.

Typewriter to Bombs

A standard non-portable typewriter contains enough aluminum for 22 magnesium incendiary bombs, and enough rubber for a pair of rubber boots for the Army.

## Rationing At a Glance

### Sugar

Stamps in Book 4—Stamps No. 30, 31, 32 and 33 are each valid for the purchase of 5 lbs. of sugar for an indefinite period. Sugar Stamp No. 40 can be used for the purchase of 5 lbs. of sugar for home canning until February 1, 1945. Postage tokens made up to December 1st on Form R-323 to the local War Price and Rationing Board for 20 lbs. of sugar per person for canning purposes.

### Processed Foods

Stamps in Book 4—BLUE stamps of the "A" series from A-1 through A-5 and RED stamps of the "B" series from A-5 through G-5 are valid for 10 points each indefinitely. BLUE tokens expire on September 26.

### Mats, Cheese, Butter, and Canned Milk

Stamps in Book 4—RED stamps of the "A" series from A-1 through Z-8 and RED stamps of the "B" series from A-8 through G-5 are valid for 10 points each indefinitely. RED tokens are valued at one point each indefinitely.

### Shoes

Stamp in Book 4—"Airplane" stamp No. 1 and "Airplane" stamp No. 2 are each valid for one pair until further notice.

### Stamps

Certificate for purchase must be obtained on form R-323 to local War Price and Rationing Board for coal and wood oil, or gas heating stoves; for coal and wood oil, or gas cooking stoves, or for a combination cooking and heating stove.

### Fuel Oil

Period 4 and Period 5 coupons issued for the 1943-44 heating season are valid for the delivery of fuel oil and kerosene until April 1, 1945. Period 1 coupons issued for the 1944-45 heating season are valid as soon as received. Unit value has been established at 10 gallons. A 5-unit coupon is good for 50 gallons. Definite value cannot be ascertained and indefinitely for the amount indicated on the face of the coupon. Fill your tank now!

### Gasoline

A-12 coupons expire September 22. B-4, B-5 and C-4 and C-5 coupons are valid for 5 gallons each until used. B-3 and C-3 coupons expire October 1. A-12 coupons marked with QTR are valid for 5 gallons each until September 26. A-13 becomes valid September 22.

### Tires

Application for new or used tires approved by an official OPA tire inspector must be made, accompanied by the tire inspection record, to the local War Price and Rationing Board. Certificate of need will be issued within the Board's allowable quota. Periodic inspections are no longer necessary.

### NOTICE!

For your protection against the black market, the rationing rules now require that every car owner immediately write his license number and state on ALL gasoline coupons in his possession.

More than \$4 per cent of Bulgarians, 6,000,000 people are the Greek-Orthodox religion.

## MAKES STUDIES OF SUGAR BEET

### Portion Wasted Capable Of Producing Many Products

That discarded sixth of the nation's \$79,538,000 sugar beet crop, the crowns, is pregnant with possibilities for the manufacture of vitally important industrial chemicals including ethyl alcohol, butyl alcohol and acetone, laetic acid, citric acid and even butylene glycol, used to make butadiene from which artificial rubber is manufactured.

These discoveries were made after a year's research on sugar beets and the by-products of beet sugar manufacture by Dr. M. N. Mickelson of the University of Michigan Medical School. The work has been sponsored by the Michigan Farmers and Manufacturers Beet Sugar Association.

Previously the crowns, the top inch of the beet, had been laboriously lopped off by hand and left in the fields or used for cattle feed, because their high content of mineral salts does not interfere; in fact it is a help in the large fermentation processes by which industrial chemicals are manufactured.

The salts and a plenteous supply of vitamins are as necessary to the bacteria, yeast and molds which bring about fermentation as they are to human life. Beet crowns are rich in vitamins, especially those of the B complex, and while these vitamins probably will never be extracted for human consumption since they can be made cheaper synthetically, they are specially valuable not only for direct fermentation but also to fortify other fermentable substances which may be lacking in vitamins.

By utilizing beet crowns, harvesting would be made easier. Instead of lopping off the crowns, the farmer could mow the beet tops, and then pull the whole beet. The crown could be cut off at the factory.

Dr. Mickelson compared beet molasses, the residue left after sugar manufacture, with blackstrap molasses, and found that in some respects beet molasses was superior. Both substances are now generally used in industrial fermentations.

## Railway Men Will Get Safety Awards

Award of merit certificates and cards will be presented to department heads and employees of the C. & N. W. at a safety meeting to be held tonight in the Odd Fellows Hall. The awards are made in recognition of a year of operation without a reportable accident.

E. L. Henry, superintendent of the safety department of the railroad, Chicago, will be here and will discuss safety problems. Motion pictures illustrating the subject will be shown.

NEWCOMER IN BAY—Mrs. Edith Forsman, Escanaba holds the winner in the sheepshead class in the 1944 Daily Press fishing contest. It weighed two pounds, nine ounces, was 16 1/2 inches in length and 12 1/2 inches in girth. It was caught while trolling in Little Bay de Noc at Masonville. The bait was a June-bug spinner and worms. This year was the first during which hook and line fishermen reported catching sheepshead in the bay.

## Obituary

### NAULT INFANT

The infant daughter of Mr. and Mrs. Alphonse Nault of Nadeau died at St. Francis hospital Wednesday morning shortly after birth. Services were held at Anne's church Wednesday afternoon at 2 o'clock. Rev. Fr. Clifford Nadeau officiating, and burial was made in St. Anne's cemetery.

### JOHN FORVILLY

Funeral services for John Forvilly of Nahma were held at 2 o'clock Wednesday afternoon in the chapel of the Anderson funeral home with Rev. John A. Kallman of the Baptist church of Gladstone conducting the rites. The pastor's text from Ecc. 7th Chapter, 2nd and 3rd Verses, was: "For it is better to go to the house of mourning than to the house of feasting, for that is the end of all men."

C. Arthur Anderson sang two hymns, "Does Jesus Care" and "Ivy Palaces." Mrs. Leonard Nelson was an accompanist.

Burial was made in Lakeview Cemetery. Pallbearers were Charles R. Larson, Francis Shampo, John Makki, Lester Cole, Walter Nordquist and John Emerson of Chicago.

Those at the funeral included Mr. and Mrs. John Emerson of

## SALARIES ARE ON INCREASE

### Beginning Teachers Are Receiving About One-Third More

Salaries of beginning teachers in Michigan have increased a full third since 1941, and salaries of the whole profession have advanced almost that much — but still the shortage of teachers is acute, it was reported here today by the University of Michigan Bureau of Appointments and Occupational Information as a result of the annual cooperative survey of the profession made by the appointment bureaus of all teacher training institutions in the state.

The average salary of beginning teachers from all Michigan colleges in 1941 was about \$1,200. This had increased to \$1,525 by the fall of 1943, with teachers from the University of Michigan getting almost \$1,600. This year, however, the general average had gone to \$1,700 and a number of schools were offering less than \$1,600.

The survey, which covers supply, demand, salaries, and placement of teachers, attributed the higher wages partly to teacher shortages and partly to the universal rise in salaries along with rising prices. Another factor has been higher teaching standards in many Michigan schools, where masters' degrees are demanded.

Despite better wages, the study showed that the colleges were preparing a third less teachers than they were before the war and that at least a fifth of those preparing to teach were not going into the profession.

### Elizabethan Sugar

Queen Elizabeth of England first introduced sugar into her domestic household as an article of diet in the middle of the 16th century. Prior to that time, the limited amount produced was mainly used for medicinal purposes.

Kamin-Brukardt  
Wedding Service  
Solemnized Here

In a double ring ceremony which took place Sunday afternoon, Sept. 17, at two o'clock, at Salem Evangelical Lutheran church here, Miss Doris Kamin, daughter of Mrs. Ann Kamin of 1425 Seventh street, Marinette, became the bride of Sgt. William E. Brukardt, Jr., of the Army Air Force, son of Mr. and Mrs. William R. Brukardt, Sr., of Wilson.

Rev. A. A. Gentz, pastor of Trinity Evangelical Lutheran church of Marinette, solemnized the service.

The traditional bridal marches were played by Miss Helen Lutz and organ music was played softly by Miss Lutz during the entire ceremony.

The bride wore a gown of white silk faille, shirred bands forming the bodice with its sweetheart neckline and long pointed sleeves and skirt, full length. Her veil of white illusion was caught to a tiara of orange blossoms. She wore rose gold heart locket set with the bridegroom, and her bouquet, which she presented to the bridegroom's mother after the ceremony, was formed of gladioli and baby mums with white satin shower ribbons. Mrs. Earl Brukardt of Wilson, who was matron of honor, wore pastel blue, the gown made with a taffeta bodice and full chiffon skirt, and she carried gladioli and baby mums.

Earl Brukardt, brother of the bridegroom, was best man.

The bride's mother wore a moss green print and the bridegroom's mother wore navy blue faille. Both mothers had shoulder corsages.

A wedding dinner for immediate family members was served at the Sherman hotel. Aster and mums in pink and white were used on the table with the center-

piece a two-tiered wedding cake, topped by a miniature soldier and his bride.

## Wedding Trip

The couple left on a wedding trip to an unannounced destination, the bride, for traveling, wearing a brown dressmaker coat, with velvet trim, a matching coat, trimmed with muskrat, and brown accessories.

Pvt. Walter Lenis has returned to Laredo, Texas, after spending a ten-day furlough with his parents, Mr. and Mrs. Louis Lenis, Lake Shore Road.

Pvt. William LaCrosse left Wednesday morning for Fort Jackson, S. C., after spending a nine-day furlough at the home of his parents, Mr. and Mrs. William E. LaCrosse.

Pvt. LaCrosse left yesterday for Chicago where she will be employed.

Mrs. George Rivers has returned to Sacramento, Calif., after a week's visit with her parents, Mr. and Mrs. Adolph Quist, and with Mr. and Mrs. George Rivers, Sr.

Mrs. Ralph Godfrey and daughter, Janice, have returned to Sherman, Texas, after a month's visit with friends and relatives.

Mrs. G. A. Swanson and Mrs. Robert Wilson have returned home at Stevens Point, Wis., after a visit with Mrs. Rudolph Schwarz.

Mrs. E. A. Sayen is visiting with Mrs. Harry Lemmer in Marquette this week.

Mrs. E. Seers left Wednesday for Negauau where she spent the weekend as the guest of Mrs. Charles Steele.

Mr. and Mrs. Adelye Boudreau and daughter, Violet, Mrs. Hubert Boudreau and daughter, Darlene, and Dr. G. H. Gibbleau have returned from Great Lakes where they spent the weekend with A. S. Hubert Boudreau, who is receiving his boot training at the naval training station.

Pfc. Vern Tripp and Miss Barbara Hildebrandt of Rice Lake, Wis., visited here Wednesday with Mrs. Edward C. Powers. Pfc. Tripp was a buddy of Sgt. Edward Powers during the North African and Sicilian campaigns and is now on furlough. Sgt. Powers is now in France.

D. W. MacDonald, who recently returned to Escanaba for a short stay, left Tuesday night for Minneapolis.

Philip F. Bruce, son of Mr. and Mrs. P. F. Bruce, of 299 North 13th street, has returned to Michigan State college, East Lansing, where he is an upper classman in the school of veterinary medicine.

Stephen Garber, utilities mana-

ger for the city of Marquette, was in Escanaba yesterday. He is a former secretary of the Escanaba Chamber of Commerce.

Mrs. E. A. Sayen is visiting with Mrs. Harry Lemmer in Marquette this week.

Mrs. E. Seers left Wednesday for Negauau where she spent the weekend as the guest of Mrs. Charles Steele.

Lucille Nauschuetz of New York City, daughter of Rev. and Mrs. G. C. Nauschuetz, 1606 Ludington street, is visiting at the home of her parents.

Miss Mary Hermes, who was taken seriously ill while in Ashland hospital, is a patient at the Ashland hospital.

Mr. and Mrs. S. E. Dunn have returned from Howell, Mich., where they attended the funeral services for Mr. Dunn's father, James Dunn.

Mrs. Earl Klienier of Clintonville, Wis., and Mr. and Mrs. Lawrence Haefs and Gilbert Haefs of Bear Creek, Wis., were guests at the home of Mr. and Mrs. Edwin Ettenhofer, Escanaba, Route One, over the weekend.

Miss Audrey Ettenhofer and Miss Eleanor Anderson left Sunday morning by bus for Lansing.

Pvt. Kenneth Larson has returned to Camp Swift, Texas, after spending a 14-day furlough at the home of his parents, Mr. and Mrs. Peter Larson, Escanaba, Route One, and with his sister, Dorothy, and other relatives in Milwaukee.

Pvt. Larson is attached to the Heavy Automotive Maintenance Division of the Fourth army and recently returned from Tacoma, Wash., where he completed an eight week course in welding at Mt. Rainier Station.

A. R. T. 2/c Bill Loeffler, who is stationed at the Naval Air Station at Traverse City, is spending a short furlough with his parents, Mr. and Mrs. O. F. Loeffler.

John Fillion left Wednesday morning for Chicago where he is a student at the University of Chicago.

Y 2/c Clifford Derouin is returning tonight to Treasure Island, Calif., after spending a 21-day furlough at the home of his parents, Mr. and Mrs. Oliver Derouin.

Miss Ruth Mullaly of Dearborn, Mich., is a house guest this week at the Bertrand J. Henne residence.

Belle Erickson is spending a vacation at the home of her parents, Mr. and Mrs. Edward Erickson, South Fifth street. She is awaiting her call for the WAVES.

Pfc. Kenneth Anderson has arrived from Keesler Field, Miss., to spend a 15-day furlough with his parents, Mr. and Mrs. Harold Anderson.

Now that slacks and shirts are practically a must for school, active sports and defense work we recommend our man tailored all wool slacks. Beautifully tailored in navy or brown. With them wear a lumberjack shirt.

Delinquency Will  
Be Main Topic of  
Parent Institute

Parental cause and cure of child delinquency will be the chief topic at the 15th annual Parent Education Institute to be held at Escanaba on October 4.

Along with the responsibilities of parents, the role communities can play in developing better citizens and parents for the future will be threshed out.

The meeting at Escanaba is one of the six to be held in the Upper Peninsula, the others being: Sault Ste. Marie, Sept. 27; Marquette, Sept. 28; Houghton, Sept. 29; Ironwood, Oct. 2; and Iron Mountain, Oct. 3. These meetings are in place of the single state session. The change was made to save money and serve the many persons who could not otherwise attend.

Speakers and topics will be: Mrs. Belle Farley Murray, lecturer on parent education, "A Measuring Rod for Parents"; T. Luther Purdom, vocational guidance authority, "What Should Be Known About Every Child"; C. E. Erickson, education professor at Michigan State college, "Helping the Child Grow Vocationally"; Mrs. Farley and Dr. Purdon are from the University of Michigan.

Immanuel Lutheran League

The Luther League of Immanuel

Lutheran church is meeting this evening at 8 o'clock at the home of Mrs. Ludwig Brandso, 1004 Tenth avenue south. Mrs. Brandso and Katherine will be hostesses. A good program has been arranged, including a talk by Lt. Thor Nilsen, who recently re-

turned from overseas service.

Sponsorship Group

Planned to help teachers and parents better understand children's problems, the Institute is sponsored by the University's Extension Service and the Michigan Congress of Parents and Teachers, cooperating with the Michigan Child Study Association and the American Association of University Women.

This is the first time the Institute has been held in the Upper Peninsula.

A ring mold will make ordinary noodles, rice and gelatin desserts extra special.

New  
Cream Deodorant  
Safely helps  
Stop Perspiration

AKKIE  
ARRID  
ARRID is the largest selling deodorant

39¢ Plus Tax  
Also 59¢ Tax

ARRID

1. Does not irritate skin. Does not rot dresses and men's shirts.  
2. Prevents under-arm odor. Helps stop perspiration safely.  
3. A pure, white, antiseptic, stainless vanishing cream.  
4. No waiting to dry. Can be used right after shaving.  
5. Awarded Approval Seal of American Institute of Laundering—harmless to fabric. Use daily regularly.

## Worry Clinic

With Case Records Of  
A Psychologist

BY DR. GEORGE W. CRANE  
CASE D-253: Orin J., aged 35,  
is a Chicago physician.

"The suicide rate in Illinois for the five year period ending in 1942 was 1,114 deaths per year," he informed me recently.

"Our death rate from pneumonia has been slightly above 3,000 per year. In 1942, for example, it was 3,173."

"Dangerous though we regard pneumonia, yet suicide was one-third as serious."

"The annual death rate in Illinois from diabetes was 2,448, so our annual suicide rate is almost half that figure."

"If you can help people through your scientific column, so they will extrovert their personalities and learn to win friends, as well sweethearts and mates, then you will have aided greatly in reducing the suicide rate."

## DIAGNOSIS

Probably the great majority of suicides are due to psychological reasons, and thus are potentially preventable.

But suicides are not the only medical hazards which psychology can greatly eliminate.

One of our prominent medical educators recently stated in print that at the present rate of increase in the number of patients entering mental institutions, within 50 years one-half the population of the world would be mental patients with the other half required to take care of them!

Aside from the humanitarian view of this alarming trend, think of the sheer cost to the taxpayer to support such public sanitarians.

## Vaccinate Against Insanity

This daily psychology column attempts to vaccinate you and your children against insanity, suicide, divorce and those other troubles that cause folks unhappiness or neurotic worries.

Some types of insanity are strictly organic. They result from chemical poisons, chronic alcoholism, syphilis germs etc.

But the greater number of insanity cases are apparently due to psychological factors.

Shy, wallflower adolescents feel devoid of friends and become victims of serious inferiority complexes.

They begin to focus their attention on their skin blemishes or bowed legs, or crossed eyes or big noses or prominent ears, or blushing or stuttering, or guilt complexes until they lose social perspective.

Without friends and social good times, they may brood. Finally they develop peculiar ideas or obsessions, and may finally think they are being persecuted.

## Menopausal Insanity

Many patients also lose their minds at the menopausal age, for men and women then tend to become introverted and moody.

They seem to fear they will lose their sex appeal and thus be ostracized. They go through a process of "involution." Finally they even fail to respond to the conversation of their friends or relatives, but sit and stare blankly into space.

In this column we discuss all of these psychological complexes from week to week, and offer you bulletins for changing your personal perspective.

These discussions and medico-psychological bulletins are simply psychological vaccination by which you can prevent insanity and other psychological troubles. Take advantage of them. Vaccinate yourself and your family while you have time!

(Always write to Dr. Crane in care of this newspaper, enclosing a long 3c stamped, addressed envelope and a dime to cover typing or printing costs when you seek personal advice or one of his psychological charts.)

## Isabella

Isabella—The Catholic Guild is giving a benefit card party Saturday night, September 23 at the home of Mr. and Mrs. Lloyd Paineau. Visitors are welcome. Lunch will be served.

Visitors from Nahma who attended the guild at the home of Caleb Johnson were Mrs. John Turack, Mrs. Begal Hebert and two daughters and Mrs. Arnold Turan and son David.

Mrs. Isador Bonita and Catherine were Escanaba business callers Saturday.

Arvid Sundine, Jr. visited Marigold Sunday at Powers.

John Kallin of Escanaba visited Sunday with relatives and friends.

Chief Boatswain Roy Wester and wife arrived from San Leandro, Calif., Friday night to visit at their parental homes.

Miss Elizabeth Bonifas of Lake Linden spent the week end with relatives and friends here.

Mrs. Arvid Sundine Jr. is visiting his sister and brother-in-law at Lake Gogebic.

Relatives and friends have been informed that Richard Johnson son of Mr. and Mrs. Howard Johnson of Engadine formerly of Isabella married Saturday to Miss Vitalia Woolard of Little Chute, Wis.

Pete Forslund who is employed at St. Ignace spent the week end with his family.

Albert Gouin 8 1/2 c is now situated at Treasure Island.

Mr. and Mrs. Caleb Johnson received word their son, Leroy, of Norfolk, Virginia was operated on for appendicitis and is improving rapidly.

THE MAN WHO CAME BACK—After leaving doomed Corregidor in 1942, against his will, but in obedience to orders, Gen. Douglas MacArthur declared, upon safe arrival in Australia: "I came through, and I shall return." He has now kept that promise. (NEA Photo.)

## Dewey And Bricker May Be Victors In Missouri

McKittrick Clark Mattingly Donnell

er for them to bury the hatchet—now that each has one of the two top places on the state ticket—and pull together for party victory in November.

## May Shift to GOP

It was really in part because of this fight, and the strained relations it produced, that the convention of the country's 26 Republican governors was brought to St. Louis at this time. To avoid embarrassment arising from the fight, Governor Dewey, at the last minute, interpolated a visit to Springfield, Ill., for Missouri primary day, instead of coming directly here from Pittsburgh as he had planned, and stopping in Illinois on the way home.

Missouri is the most populous of the border states and now, as things appear to be turning out, is considered as probably the most likely to shift this fall to the GOP electoral column.

The simultaneous victory of the Mattingly candidate for the GOP gubernatorial nomination, Jean Paul Bradshaw, may help to heal the wounds between National Committeeman Barak T. Mattingly and Governor Donnell, and result in an all-out Republican effort on behalf of the whole first class race.

# Defeat At Detroit, 8-2, Dims Pennant Hopes Of New York Yankees

## BROWNIES SLICE THEIR HANDICAP

**Senators Stopped, 5-2;**  
**Chet Laabs Leads**  
**11-Hit Assault**

St. Louis, Sept. 20 (P)—The St. Louis Browns, battling to stay in the race for the American League Pennant, defeated the Washington Senators tonight 5 to 2 as Jack Kramer won his 15th game of the year. The Browns now trail Detroit by one and a half games.

The victory was the eighth for the Browns over the last-place Senators against two losses in Sportsman's Park. It was Kramer's second decision against four defeats by the Nats.

The good-looking right hander walked only one man and struck out one while giving up eight hits. Stan Spence, noted for his spectacular hitting in the Browns park, hit two doubles to bring his hitting total for the series to five, four of them extra base hits.

Chet Laabs, who replaced Al Zarilla in the St. Louis outfield, led the 11-hit attack on Mickey Haefner and Alex Carrasquel with three singles, two of which scored runs.

Senators... 000 010 100—2 8 2  
St. Louis... 020 010 20x—5 11 0  
Haefner, Carrasquel and Ferrell; Kramer and Hayworth.

## Six Runs Pushed Across In 7th As Sox Trip Athletics

Chicago, Sept. 20 (P)—After being shut out for six innings, the White Sox ganged up on Russ Christopher for six runs in the seventh inning tonight and defeated the Philadelphia Athletics, 6 to 1. Third Baseman, Gray Clarke singled twice in the biginning.

Orval Grove, who retired for a pinch hitter during the rally, was credited with his season's 14th victory. He and Gordon Maltzberger held the A's to six hits, while Hodges, who batted for Grove, singled in the first two runs.

The game ended the season's play between the teams with 13 wins for the A's in the 22 games and moved the Chicagoans to within a half-game of the sixth-place A's. Attendance was 2,653. Philadelphia 100,000,000—1 6 0  
Chicago... 000 000 60x—6 7 2  
Christopher, Berry and Hayes; Grove, Maltzberger and Jordan.

## Crown Clinching Of Cards Delayed By Pirates, 2 to 1

Brooklyn, Sept. 20 (P)—The Pittsburgh Pirates delayed the St. Louis Cardinals' pennant clinching today by taking a close 2-1 ball game from the Brooklyn

Fred Elliott, returning to the regular lineup after a layoff due to an injury, drove in both Pirate runs, sending home Jim Russell with a double in the second inning and scoring Pete Coscarat in the seventh with a single. Elliott is now only four RBI's shy of the century mark, which he achieved last year. Pittsburgh 001 000 100—2 7 1  
Brooklyn... 000 001 000—1 6 2  
Strinevich and Lopez; Wells, Harter, Poat, Heving, Bagby and Webber and Owen.

## BENGALS TAKE FIFTH STRAIGHT

Dozen Hits Help Dizzy Trout Snag His 25th Victory

Detroit, Sept. 20 (P)—Hammering out a dozen hits, all but one of them figuring in the scoring, the Detroit Tigers today handed the New York Yankees their fifth straight loss, 8 to 2, to shove the Yanks four games off the American pace and virtually smother New York pennant hopes.

Paul (Dizzy) Trout, scoring his 25th pitching victory against a dozen defeats, scattered seven Yankee hits in chalking up his sixth straight verdict over the champions this season.

Frank Crosetti belted his fifth homer into the left field stands in the seventh inning with Nick Ettin aboard for New York's only runs. Ettin had opened the inning with a single and it was the only time during the game that the Yanks had more than one base runner in an inning.

### Wakefield Homers

Dick Wakefield led off the Tiger second with an inside the park homer, his ninth this year. The blow was one of but two the Tigers got off Rookie Mel Queen in the first four innings. Two big frames subsequently provided the lone margin.

Singles by Roger Cramer, Mike Higgins, Ruey York and Wakefield accounted for two Detroit runs in the fifth, enough to win behind Trout.

Queen weakened in the eighth as the first five Tiger batters reached first safely—four on hits and one on Crosetti's error—and all scored as 10 men came to bat before Righthander Floyd Bevens came in to retire the last man.

Four of New York's seven hits off Trout went for extra bases but Dizzy was never in real trouble. Detroit was leading 3-0 when Crosetti connected for his homer, the fifth this year off Trout, who has pitched more than 320 innings.

### Crowd Near 30,000

By losing today, New York dropped its 14th of 21 games with the Tigers and suffered its ninth loss in 10 appearances at Briggs Stadium, where the season's largest week-day crowd—29,988—watched the Tigers surge steadily forward in at least two positions so that shifts can be made quickly if and when weaknesses develop under game conditions.

The important thing is that football has been reinstated at the local parochial school. The lads appreciate that. All in all, the Trojan lineup should be formidable, barring an epidemic of disabling injuries. They have a generous sprinkling of big, tough lads. A major weakness is the lack of reserve strength. After sorting out about 15 or 16 of the biggest and strongest lads from the squad, there is an abrupt break in the available material. That will prove serious if the Trojans lose several boys at one time because of injuries.

While some farmers can't make up their minds about them, because of the damage they do and the actions of some city hunters, some let you hunt on their land.

You hunt along the country roads and the town roads in the car, if you do not know of some farmer who will let you hunt on his land. Right now there is a war on and you haven't any gas to spare and few, if any shells.

When you see a bird in the ditch, you hop out of the car, take the gun out of the case and shove in a few shells. This is done to protect the game warden's temper and your pocketbook.

Then you are ready to get a nice breast of white meat. It comes from the beautiful soaring bird, the cock pheasant, when he flies. Only he doesn't fly, he runs. Runs while you are doing all the necessary things to protect the game warden's temper—and your pocketbook.

The ditch runs north and south. It is what we call beautiful cover—tall weeds, high bending grass and sedges. There are also shrubs intermingled. No brilliant bird such as the cock pheasant can see your notice—except now and then.

You know he has gone north, time out has given him a nice start and you run your legs off to get within shooting range before he flushes. There is a loud cackle 40 rods to the south as he flies up from the ditch, numbly and dumbly saunter back to the car.

You repeat this until you dare not drive another mile or you won't get back home and you fear that OFA will ask leading questions. Once in a great while you knock a bird off as he soars into the farmer's field. You dash through the barb wire and get him before the farmer can sue you.

This goes on and on throughout the season. You needn't worry much about the shortage of shells you've still got 'em after the season closes for you have fired very few.

But, fellow hunter, read the next article about pheasants. Where they are so plentiful that a dog's nose whirls around in the air like a propeller. Where the farmer meets you with open arms and everybody loves you, I can hardly wait to see you.

Port Washington, N. Y. (P)—Vegetarian dogs and cats are added starters among the perils of victory gardening here. One gardener reports that a neighbor's dog is plucking and eating his tomatoes. Another neighbor's cat claws open the husks of sweetcorn and nibbles the milky kernels.

**SUPER-SPINNER**—Largest airplane propeller ever to fly in the U.S., and probably in the world, is the big black one pictured above, at the Caldwell, N. J., Propeller Division plant of the Curtis-Wright Corporation. Recently used in stratosphere tests on a large Army bomber, the 18-foot, 2-inch prop can harness 3000 or more horsepower. Because steel blades are hollow, they are 20 per cent lighter than comparable ones of solid aluminum, increasing the plane's useful load by approximately 650 pounds. (NEA Photo.)

## The Roving Reporter

(Continued from Page One) deck at night, and against throwing cigarettes or orange peels overboard. It seems a sub commander can spot a convoy, hours after it has passed by such floating debris.

One night a nurse came on deck with a brilliant flashlight guiding her. An officer screamed at her so loudly and viciously that I thought at first he was doing it in fun. He bellowed:

"Put out that light, you blankety-blank! Haven't you got any sense at all?"

Then I realized he meant every word of it. One little light might have killed us all. I was sorry he didn't kick her pants for good measure.

Smoking was prohibited in the dining room. There was a bar for soft drinks, but no liquor was sold. As someone wisecracked, "We catch it both ways. We can't smoke because it's a British ship, and we can't buy liquor because it's an American trooper."

The trip no sooner started than rehearsals for an enlisted-men's variety show began. They dug up an accordionist, a saxophonist, a trumpetist, a violinist, two banjo players, a dancer, a tenor, a cowboy singer and several pianists.

They rehearsed every afternoon. The big night came to Gibraltar. They put on two shows that night, for the enlisted men only. Word got around, and the officers and nurses wanted to see the show, so the night we were approaching Gibraltar they put it on again.

They had cleaned it up some, at the colonel's request, but it still sparkled. The show went over terrifically. There was genuine talent in it, and serious music as well as the whiz-bang stuff. But the hero of the evening was a hairy corporal—Joe Comita of Brooklyn—who did strip-tease burlesque of Gypsy Rose Lee.

His movements were pure genius. Gypsy herself couldn't have been more sensuous. Joe twirled and stripped, twirled and stripped. And then when he was down to his long, heavy GI underwear he swung to the front of the stage, lifted his veil, and kissed a front-row colonel on top of his bald head.

The whole show was marvelously good. But there was something more to it than just that: There was the knowledge, deep in everybody's mind, that this was our night of danger.

The radio had just brought word that Germany's entire U-boat pack was concentrated in the approaches to Gibraltar. More than 50 subs were said to be waiting for us. I doubt that there was a soul on board who expected the night to pass without an attack.

And in that environment the boys from down below went through their performances buoyantly. We sat with life preservers on and water canteens at our belts. We laughed and cheered against a background of semi-con-

**CARD OF THANKS**

We wish to express our sincere and heartfelt gratitude for all the kindness, courtesies and comforting expressions of sympathy extended us in the death of our beloved mother and grandmother, Mrs. Margaret Mellette. We are grateful to those who sent flowers, to those who served as pallbearers, to those who donated the use of their cars and to all others who aided us in so many ways. Signed:

Mr. and Mrs. Joseph Mellette and Family, Mrs. Arthur LaBombard and Family, Mr. and Mrs. Albert Sovay and Family, Mr. and Mrs. John Polican and Family, Mr. and Mrs. Gene Gamache and Family, Mr. Evangelist Mellette, Mr. Zenon Mellette, 9128-265-1t

**MISSING IN ACTION**

Menominee—Flight Officer Robert Armbrust, 31, son of Mr. and Mrs. Martin Armbrust of Menominee, is reported missing according to a telegram received Saturday evening from the War Department. No details of the date or place of his disappearance were given in the message.

Armbrust enlisted in the Army Air Forces in January of this year and was commissioned a flight officer and awarded his silver wings at Fort Benning, Ga., in June of this year. He was attached to the Air Transport Command and had been ferrying planes from factory to fields. Until recently he was based at Gore Field Mont. and from that station had been ferrying ships to Alaska.

The whole show was marvelously good. But there was something more to it than just that: There was the knowledge, deep in everybody's mind, that this was our night of danger.

The radio had just brought word that Germany's entire U-boat pack was concentrated in the approaches to Gibraltar. More than 50 subs were said to be waiting for us. I doubt that there was a soul on board who expected the night to pass without an attack.

Never scrub a wood floor that has a fine finish with water.

scious listening for other sounds. As the show ended a major said to me:

"That's wonderful, those boys doing this when they're being taken to war like galley slaves down there in the hold. When you think of people at home squawking their heads off because they can only have 20 gallons of gasoline it makes your blood boil."

## CPL. GOLDBERG DIES IN ITALY

Escanaban Was Gunner  
On Flying Fortress  
Plane

Cpl. Arthur W. Goldberg, 20, Escanaba, was killed in action in Italy on Sept. 1, according to a message received yesterday from the war department.

He is survived by his stepfather and mother, Mr. and Mrs. Eric Stoneclift, 1114 North Eighteenth street, and one brother, Roy Goldberg, 4, 0, South Nineteenth street.

Cpl. Goldberg was born in Escanaba on March 24, 1924. Following his graduation from the Escanaba high school in 1942, he went to Milwaukee where he entered the employ of the Cutler-Hammer company. Joining the Army Air Force in April 1943, he received his training at Fort Sheridan, Ill., Atlantic City, N. J., Jefferson Barracks, Mo., Butler University, Indianapolis, San Antonio, Tex., Lowry Field, Colo., Panama City, Fla., gunnery school, and Westover Field, Mass.

He was assigned as a waist gunner on a Flying Fortress, and went overseas in July of this year.

## Naughty Marietta Also Very Fickle, It Seems

Utterly charming, but fickle is "Marietta," the beautiful French girl of Victor Herbert's musical comedy, "Naughty Marietta."

And it is beginning to appear that the presentation of the light opera in Escanaba is assuming the

### Munising News

Lillian Kouri has returned to Milwaukee after spending a month's vacation with her parents, Mr. and Mrs. Waino Kouri.

Pvt. Marl St. Martin left Wednesday morning for his post at Fort Meade, Md., after spending a 10-day furlough with his wife and family.

Pvt. and Mrs. Thurman Stevenson are visiting at the home of Mr. and Mrs. Guy Stevenson. Thurman is stationed at Camp Swift Texas.

Mrs. Gustave Abrams is visiting at the home of her daughter and son-in-law, Mr. and Mrs. Ernest Johnson.

Hector Boogen U. S. N. R. is spending a leave with his parents and friends. This is Hector's first leave home after being on active duty for two years. Mrs. Joseph Hollain left Tuesday for Lower Michigan where she will visit relatives for a month.

Mr. and Mrs. Ralph Morrison and family of Isabella have returned home after visiting at the home of Mrs. Amanda Maki for a few days.

George F. Leiphart has enlisted in the U. S. navy and is now awaiting his call for boot training.

Miss Faith Booker has gone to Battle Creek where she has accepted employment.

Miss Betty Hanson left this week on a 10 day vacation trip and will visit in Milwaukee, Chicago and Detroit.

Mrs. Tim Messier attended the funeral of Abraham Fleury Monday in Marquette.

Miss Florence Pelletier has gone to Evanston, Ill., where she has accepted a position in the registrar office at Northwestern university.

Jack Gordon of Birmingham, Mich., is spending a weeks vacation here with friends.

**Meets Former Patient**

Doctor Baron, in a recent letter to his wife who is now residing here told her that he recently had talked to a St. Martin in England, who formerly had been a patient of his in Munising.

When this was told to some of the St. Martins living here it was thought it was Herman St. Martin who recently was wounded in France and had been in a hospital in England for a short while.

M/Sgt. Herman St. Martin is a veteran of the European campaign having been in North Africa, Sicily, Italy and then in the invasion of France with Gen. Patton's tank forces.

**Personal**

Mr. and Mrs. Walter Anderson of Thompson were callers at the John Meadow and Herb Olsen homes Monday.

William Strasler has sold his farm to Walter Lindroth of Manistique and purchased the Albert Huescher farm.

Miss Kathie R. Lausten left Wednesday morning for California after spending a month with her mother, Mrs. Cora Lusten. Miss Betty Meadow accompanied her as far as Chicago. They spent a few days with the Misses Bernita and Pauline Wehner at Berrien Springs enroute.

Bob Foye of Manistique spent Wednesday here with relatives.

The Misses Jean and Joan Archambault of Manistique and Mr. and Mrs. Charles Reid and family spent Sunday with their parents, Mr. and Mrs. Peter Archambeau, the occasion being their 27th wedding anniversary.

Vernon, son of Mr. and Mrs. Joe Popour is recovering from an appendix operation at the Shaw hospital.

Mrs. Charles Blesser, Mrs. Marshall Wolf and children visited in Nahma on Sunday of last week.

Mr. and Mrs. Lyle Leonard and daughter and Mrs. John Carey of Escanaba spent the week end at the Herb Popour home.

Mr. and Mrs. Ernest Carlstrom, Mr. and Mrs. Gus Siefeldt and Mr. and Mrs. Clinton Welch of Manistique were visitors at the Russell Minor home recently.

John Archambeau of Manistique and Joe Hardy motored to L'Anse last Saturday to visit Joe Archambeau, a former resident here, who is quite ill with tuberculosis.

Miss Donna Reid is attending school in Marquette, Baraga county, this term.

Visitors at the John Meadow home Sunday were Mrs. Albert Foye and grandsons Jackie and Donnie Jim of Manistique.

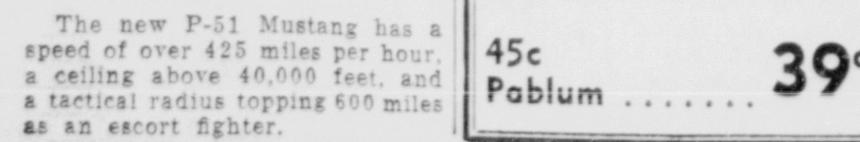

## Ceilings on Table Grapes Unchanged

There will be no change in the present maximum prices of table grapes for home consumption, the Office of Price Administration said.

This announcement is being made, OPA said, in response to recommendations by growers of table grapes that ceilings be increased to forestall possible diversion of grapes from the fresh market into the wine industry.

In refusing to grant an increase in fresh table grape ceilings, OPA said indications are that as the season advances and sufficient supplies of grapes become available, normal quantities will be obtainable both for fresh markets and for wineries at closely related prices.

The new P-51 Mustang has a speed of over 425 miles per hour, a ceiling above 40,000 feet, and a tactical radius topping 600 miles as an escort fighter.

## LAUD TEACHERS ON 'A' GAS JOB

County Educators Make  
Accurate Record,  
Says Snyder

Applying approximately 1,100 work hours, Escanaba school teachers and high school students have completed the task of processing 5,089 applications for A gas rations. The work which was expected to require three days was completed by 4:45 o'clock Tuesday afternoon.

But you know "Marietta."

Yesterday, another postponement was announced.

"Naughty Marietta" will be in Escanaba on October 12, and this is final, unless—

But hold your tickets, patient music lovers.

### Schact To Present Concert For High School Students

Otto Schact, baritone singer and lecturer, will present the first in a series of lyceum programs before the student body of the Senior High school at 10 o'clock this morning.

Mr. Schact, who now makes his home just outside of Superior, Wis., came from Germany, where he was educated, as a young man with the greatest intention of studying medicine with some music on the side. Before long he gave up the medicine and concentrated his efforts solely on music.

For many years he has been giving vocal lessons in Milwaukee and Chicago and combining this with a great deal of concert work. He has entertained audiences throughout the midwest to the Pacific Coast.

Mr. Schact is not a singer only. His program consists of an inspirational lecture along with the music. He strives to show the close correlation of music and all fine arts and that singing is an excellent basis for an appreciation of the fine art of living.

Miss Faith Booker has gone to Battle Creek where she has accepted employment.

Miss Betty Hanson left this week on a 10 day vacation trip and will visit in Milwaukee, Chicago and Detroit.

Mrs. Tim Messier attended the funeral of Abraham Fleury Monday in Marquette.

Miss Florence Pelletier has gone to Evanston, Ill., where she has accepted a position in the registrar office at Northwestern university.

Jack Gordon of Birmingham, Mich., is spending a weeks vacation here with friends.

**Meets Former Patient**

Doctor Baron, in a recent letter to his wife who is now residing here told her that he recently had talked to a St. Martin in England, who formerly had been a patient of his in Munising.

When this was told to some of the St. Martins living here it was thought it was Herman St. Martin who recently was wounded in France and had been in a hospital in England for a short while.
